Visit To

Cilepuncung River Bank
Cilepuncung is a river that flows through Bandung City. This river flows from northern to southern region in which will end in Obarum River. Across this river, the citizens often misuse it by exploiting the river-encide into housings, trading market, and etc. Because of the wrong exploitation, the river is currently in a state where it should be concerned more. Along with the riverside, the river itself is full of excesses products and household wastes. Therefore, participants should be exposed to this problem in order to create a sustainable urban settlement.

Sarimukti City Dumpster
Participants are shown the true problems of unmanaged city waste that poses grave concern for all people in Indonesia. Aside from that fact, it already has certain mechanisms in processing waste, some problems still remain, such as the final product from the water treatment is still dangerous (even the water is still in black color), endangering people who live nearby, and the unclear distribution of organic and inorganic waste.

Kota Baru Parahyangan Residence
The site visit will describe about the contribution of a residential area in managing environment at their vicinity, in order to avoid potential hazard came from their residence. This project will include campaign of Gerakan HEC (Let’s Go Green). This movement promotes balance between social, economic and environment to encourage integrated development and sustainable quality life. Participants will observe the management project of this area and also will plant topical trees at the open space around the district.

Pantai Indah Kapuk
Pantai Indah Kapuk (translated as “Beautiful Kapuk Coastline”) is an area which is located in northern region of Jakarta. This area consists of a reclamation waterfront island. As a newly developed technology in Indonesia, reclamation is seen as a two sided coins, in which some people consider it bring positive stimulus to the society yet may also become a negative impact to its environments. Participants are invited to see the reclamation area from a closer look and discuss about the feasibility of this megaproject as the development of sustainable urban settlement.

Bogor City
In this site visit, participants will be divided into groups. Bogor city, as an independent city, provides lots of public places, so it gives an opportunity for participants to explore and later discuss about the current urban condition amongst the society in Indonesia. On the other hand, it should also be considered that Bogor is a satellite city of Jakarta in which their activities should support the development of Jakarta. Participants are challenged to interview several people that live in Bogor City and make a conclusion from the interview that might be discussed in group discussion. The groups might be separated into these topic groups: education, traditional market, transportation, hospital, public service.

Cultural Activities

The Fabrication of Batik
Batik is an Indonesian traditional fabric with a specified color for each different type. Its sophisticated look unexpectedly came from a simple and traditional fabrication. In this cultural activity, participants are invited to try to make Batik by themselves.

Interactive Angklung
Angklung is an Indonesian traditional musical instrument consisting of two or four bamboo tubes suspended in a bamboo frame, bound with rattan cords. Because of the collaborative nature of Angklung music, participants in this cultural activity are invited to learn how to play Angklung and practice together.

Taman Mini Indonesia Indah
Taman Mini Indonesia Indah (TMII, translated as “Mini Garden of Beautiful Indonesia) is an amusement park located in Jakarta. This place offers a space where participants can see and enjoy the multicultural living in Indonesia. This place provides the miniatures of Indonesian Traditional Houses, specific themed museums, and specific-themed parks. Participants are invited to enjoy this amusement park as the ticket will be provided by the committee. For interactive map, click http://www.tammimini.com/tmii.php
UNIVERSITAS KATOLIK PARAHYANGAN
Proudly presents

- Enhance your knowledge and gain in-depth understanding on Sustainable Urban and Human Settlement issues by interacting directly with experts.
- Get a chance to share your thoughts and ideas with other participants in series of our interactive workshops.
- Get a different experiences on Sustainable Urban and Human Settlement in a series of field study.

Workshops

Workshop 1:
“Human Settlement in Urban Area – Lesson Learned”

Workshop 2:
Lesson Learned:
“Water Pollution”
“Solid Waste Management”

Workshop 3/Debriefing:
“The problem to create a Smart City in Developing Countries”
Three parallel topics:
“Smart Economy and Infrastructure” (group traditional market and transportation);
“Smart Living” (group education and public health);
“Smart governance”

Lectures

Leadership In Sustainability Decarbonising Cities
Speaker: Prof. Peter Newman - Sustainability Policy (CUSP)
(Institute Curtin University) - TBC

Sustainable Environmental Design and Planning in Urban Area
Speaker: Andrea Peresinu - TBC
“Challenges in Creating a Smart Cities in Developing Countries”
Speaker: Richan Kamil, ST. MUD - TBC
“Creating a Smart City for All”
Speaker: Marco Kusumawijaya - TBC
“How City Form Shapes Our Choices”
Speaker: Peter Newman
“Social Sustainability and its Measurement in the Context of Sustainable Urban Regeneration”
Speaker: James Madison University, the USA
“Energy Sustainability and Social Cohesion”
Speaker: Prof. Dr. Frans Stockman OR Dr. Albert Bressand –
University of Groningen, the Netherlands - TBC

Important Dates of ISC

- 10 October: Early Registration
- 24 October: Announcement
- 7 November: Special Country Confirmation
- 11 November: Final Confirmation
- 12 November: Invitation Letter
